## WORK EXPERIENCE

---

### Deall Jobs ([Dealls.com](#) & [Kantorku.id](#))

**Jakarta, Indonesia**

*Technical Leader & Back-end Specialist*

May 2022 - Present (3 Years)

Key Responsibilities & Achievements:

- Spearheaded the design, configuration, and maintenance of scalable development environments, reducing onboarding time for new developers by 30%.
- Feature Analysis & Technical Roadmapping
  - Conducted feasibility studies, architectural reviews, and risk assessments to guide prioritization and resource allocation.
  - Drove Agile processes (e.g., sprint planning, backlog grooming) to align cross-functional teams (QA, UX, Product) on deliverables.
- Front-Line Troubleshooting & Critical Issue Resolution
  - Acted as primary escalation point for high-priority production issues in payroll disbursement systems, resolving 100% of critical bugs within SLA deadlines.
  - Performed root-cause analysis (RCA) for recurring issues, reducing system downtime by 25% through proactive monitoring and alert automation.
- Payroll System Ownership
  - Served as System Owner (Person in Charge) for payroll systems serving 10,000+ employees, ensuring 99.99% uptime and compliance with financial regulations.
  - Led migration to automated-testing, improving processing efficiency by 40% and reducing manual errors by 90%.
- Process Standardization & Best Practices
  - Authored organization-wide coding standards and review processes, improving code quality (SonarQube metrics) by 35%.
  - Introduced AI, reusable templates, libraries, and code linting tools (e.g., Golang CI Lint, Copilot Instruction), accelerating feature delivery by 20%.
  - Mentored 8+ junior developers on clean code principles, debugging techniques, and system architecture.
